Assistant Research Professor
Milken Institute School of Public Health
Department of Environmental and Occupational Health
George Washington University
Email: dgoldberg@email.gwu.edu

Scientific and Technical Background

My research uses satellite data and models to characterize global air pollution and greenhouse gas emissions at neighborhood scales. My work primarily revolves around two satellite instruments: the TROPOspheric Monitoring Instrument (TROPOMI) and the Tropospheric Emissions Monitoring of POllution (TEMPO). Both instruments measure a toxic air pollutant, nitrogen dioxide (NO_2) that results primarily from fossil fuel combustion. NO_2 is closely linked to other atmospheric pollutants, such as ozone (O_3), particulate matter ($PM_{2.5}$), and carbon dioxide (CO_2). Results from his research have identified sources of air pollution and greenhouse gas emissions that have been previously mischaracterized or unknown, ultimately leading to better state and federal regulatory policies and guidance.

Academic Degrees

2015	Ph.D.	University of Maryland, Atmospheric & Oceanic Science
2013	M.S.	University of Maryland, Atmospheric & Oceanic Science
2009	B.S.	Lafayette College, Chemical Engineering

Professional Appointments

2021–present	Assistant Research Professor	George Washington University
2019–2021	Staff Research Scientist	George Washington University
2019–2021	Staff Research Scientist	Argonne National Laboratory
2016–2019	Postdoctoral Scientist	Argonne National Laboratory
2010–2015	Graduate Research Assistant	University of Maryland
2009–2010	Environmental Engineer	TRC Solutions

Service & Leadership

2026	Faculty Mentor	NASA Student Airborne Research Program (SARP)
2024	Expert Reviewer	EPA NO_x Integrated Science Assessment
2024	Lead Discussant	EPA Ozone NAAQS Pre-Review Workshop
2023–2024	Panel Reviewer	NASA Earth System Explorers (ESE)
2021–2024	Technical Advisory	Metro Washington DC Air Quality Committee
2021	Panel Reviewer	National Science Foundation (NSF)
2021	Panel Reviewer	Netherlands Organization for Scientific Research
2021	Mentor	NASA DEVELOP Internship Program
2021	Session Organizer	American Meteorological Society
2019–2020	Session Organizer	American Geophysical Union
2019–2022	Panel Reviewer	NASA Postdoctoral Program (NPP)
2019	Panel Reviewer	NASA ROSES
2016–2018	Executive Board Member	Argonne Postdoctoral Society
2016–2017	Mentor	ACT-SO High School Science Competition
2011–2013	Executive Board Member	UMD Atmospheric Science Graduate Students
2007–2008	Student President	Lafayette College Environmental Club

Teaching Experience

2023 – 2026 George Washington University, Sustainable Energy and Environmental Health
3-credit undergraduate class for upperclassmen (30 students)

2020 – 2022 George Washington University, Global Climate Change and Air Pollution
Guest Lecture on using measurements and models to estimate air pollution

2012 – 2013 University of Maryland, AOSC200: Introduction to Weather and Climate
Head TA. Taught 2 lectures per week. Graded all exams, quizzes, and projects.

Junior Scientists Advised

Post-doc (7 total): Dr. Arash Mohegh (2019 – 2021), Dr. Gaige Kerr (2020 – 2022), Dr. Doyeon Ahn (2021 – 2024), Dr. Katelyn O'Dell (2021 – 2023), Dr. Tess Carter (2022 – 2023), Dr. Omar Nawaz (2023 – 2025), Dr. Daniel Huber (2023 – present)

Post-Bachelors (7 total): Nigel Martis (2021 – 2022), Xavier Nogueira (2021 – 2022), Perrin Krisko (2021 – 2023), Rishabh Khanna (2022), Ziyad Maknojia (2022), Sara Runkel (2023 – 2024), Erin Campbell (2024 – 2025)

Undergraduate (3 total): Duncan Quevedo (2021), Emily Richardt (2022), Olivia Paquette (2024)

Related Professional Experience

2012 – 2014 National Atmospheric Deposition Program Primary Site Operator
2012 – 2014 Clean Air Status & Trends Network Primary Site Operator

Awards & Honors

2020 Impact Argonne Award for Extraordinary Effort
2015 Outstanding Graduate Assistant Award for top 2% of all graduate students
2012 Service Award for dedicated service to UMD Atmospheric Science Dept
2009 American Chemical Society (ACS) Award for top chemical engineer in class
2008 Tau Beta Pi Engineering Honor Society for top 20% of engineering class

Instrument and Model Expertise

Satellite data for atmospheric composition: TROPOMI (NO_2, HCHO, CO, CH_4), TEMPO (NO_2, HCHO), OMI (NO_2, HCHO), OCO-2 (CO_2), OCO-3 (CO_2), MODIS AOD (Dark Target, Deep Blue, & MAIAC), VIIRS AOD (Dark Target); Chemical transport models: CAMx, CMAQ, WRF, WRF-Chem; *In situ* measurements: O_3 UV analyzers, NO_x chemiluminescence analyzers, Low-cost $PM_{2.5}$ sensors, Pandora spectrometers, GCAS spectrometer

Editorial Review

Peer reviewer for academic journals: Atmospheric Chemistry and Physics; Atmospheric Environment; Atmospheric Measurement Techniques; Earth and Space Science; Environmental Research Letters; Environmental Science and Technology; Elementa; Geophysical Research Letters; Journal of Geophysical Research – Atmospheres; Nature Communications; Proceedings of the National Academies of Science; Remote Sensing of the Environment; Science of the Total Environment; Scientific Advances

Manuscripts Under Review (3)

1. Goldberg, P. M., Abhishek Anand, A., **Goldberg, D. L.**, Westervelt, D M. Variable Short-Term Air Quality Impacts of New York City's Congestion Pricing Policy. Submitted.
2. Dickens, A. F., **Goldberg, D. L.**, Nergui, T., Adelman, Z. E. The changing ozone formation sensitivity in two Midwestern cities over 3 decades (1992 – 2021): Insights from a weekday-weekend analysis coupled with examination of trends over space and time. Submitted.

Competitive Grants Selected for Funding (14 total)

1. "Societal benefits of TEMPO NO_2: Applications for air quality management, $400,000, ***Principal Investigator***
2. "Evaluating Updates to CAMx and NOx Emission Inventories using TEMPO Measurements over Texas", September 2024 – September 2025, $230,000, ***Co-Investigator,*** (PI: Jeremiah Johnson, Ramboll)
3. "Efficacy of Vehicle Emission Control Interventions in Ameliorating Air Pollution Exposure and Health Burdens in Marginalized Communities", August 2024 – August 2027, $1,000,000, **Co-Investigator** (PI: Daniel Horton, Northwestern University)
4. "Assessing environmental justice air quality, and health co-benefits of transport interventions in US urban areas", NASA, November 2023 – June 2025, $1,200,000, ***Co-Investigator*** (PI: Gaige Kerr, George Washington University)
5. "Pushing the boundaries of fine-scale NO_X emission quantification from remote sensing instruments", NASA, April 2023– March 2026, $750,000, ***Principal Investigator***
6. "Source-sector NOx emissions analysis with sub-kilometer scale airborne observations in Houston during TRACER-AQ", Air Quality Research Program (AQRP), August 2022– August 2023, $ 248,146, ***Principal Investigator***
7. "Air Quality Modeling to Investigate Environmental Injustice in Washington, DC & Baltimore", George Washington University Research Innovation Award, July 2022– June 2024, $75,000, ***Principal Investigator***
8. "Value of GeoXO atmospheric composition data for estimating air pollution-related health impacts", NOAA, August 2021 – September 2025, $800,000, ***Co-Investigator*** (PI: Susan Anenberg, George Washington University).
9. "Using satellite NO_2 observations for public health surveillance and environmental policy planning at global, national, and urban scales", NASA HAQAST, January 2021 – January 2025, $800,000, ***Co-Investigator*** (PI: Susan Anenberg, George Washington University).
10. "Inconsistent effects of social distancing on air quality in global cities: lessons for protecting near-term public health and designing longer-term urban transportation policies", NASA Rapid Response, June 2020 – May 2021, $100,000, ***Co-Principal Investigator*** (Co-PI: Susan Anenberg, George Washington University).
11. "Updating the Wisconsin Horizontal Interpolation Program for Satellites (WHIPS)", Texas Commission on Environmental Quality Research Program, June 2020 – November 2021, $200,000, ***Co-Investigator*** (PI: Tracey Holloway, University of Wisconsin).
12. "Integrating satellites, ground monitoring, and modeling to estimate long-term NO_2 exposures and associated pediatric asthma impacts", Health Effects Institute, November

2019 – November 2021, $120,000, ***Co-Investigator*** (PI: Susan Anenberg, George Washington University).

13. "The Changing Atmosphere in North America for 2000 – 2020: High-resolution modeling and satellite analysis", NASA ACMAP, May 2019 – April 2023, $750,000, ***Co-Investigator*** (PI: Greg Carmichael, University of Iowa).
14. "Taking OMI NO_2 to the next level: Inferring global fossil fuel CO_2 emissions using OMI NO_2 Data Improved with Critical Algorithm Updates", NASA ACMAP, June 2017 – May 2020, $750,000, ***Co-Investigator*** (PI: Nick Krotkov, NASA Goddard)

<u>Competitive Grants Not Selected for Funding (15 total)</u>

1. "Strengthening U.S. interagency air quality management with geostationary satellites, Submitted July 2024, Not Selected, ***Co-Investigator*** (PI: Susan Anenberg, George Washington University)
2. "Using satellite NO_2 and low-cost sensor data to understand urban PM2.5 disparities", Submitted June 2024, Not Selected, ***Principal Investigator***
3. "Assessing disaster risk and resilience action benefits associated with compound heat and air quality hazards, exposures, and vulnerabilities", Submitted June 2024, Not Selected, ***Co-Investigator*** (PI: Omar Nawaz, George Washington University)
4. "Quantifying hyperlocal variations in traffic-related pollution: A citizen science approach from New York to Nairobi", Submitted May 2024, Not Selected, **Co-Investigator** (PI: Gaige Kerr, George Washington University)
5. "Investigating urban anthropogenic CO_2 and NO_x emissions from the C40 Cities using the synergy of the OCO-2/3 and NO_2-observing missions", Submitted June 2023, Not Selected, ***Principal Investigator***
6. "Structural Racism: Assessing and Addressing Community Exposures to Environmental Contaminants", Submitted August 2021, Not Selected, ***Co-Investigator*** (co-PIs: Susan Anenberg, George Washington University and Sacoby Wilson, University of Maryland)
7. "From space to the street: Using satellite remote sensing to address environmental injustice from transportation-related air pollution", Submitted June 2021, Not Selected, ***Co-Investigator*** (PI: Susan Anenberg, George Washington University)
8. "A comparative study of atmospheric impacts due to changes in anthropogenic activity during the COVID-19 pandemic in the greater Chicago and New York City regions", Submitted November 2020, Not Selected, ***Co-Principal Investigator*** (co-PIs Greg Carmichael and Charles Stanier, University of Iowa)
9. "Developing a near-real-time satellite-based framework to estimate urban NOx emissions in preparation for the TEMPO satellite mission: Using TROPOMI and model simulations as test-beds", Submitted September 2020, Not Selected, ***Principal Investigator***
10. "Using Satellites to Monitor Energy Usage and Inform Responses to Disasters", Submitted June 2020, Not Selected, ***Co-Investigator*** (PI: Jason West, UNC-Chapel Hill)
11. "Application of Remote Sensing Tools to Verify, Validate, and Improve Emissions of NO_2 and SO_2 for Texas Air Quality Modeling", Submitted January 2020, Not Selected, ***Co-Investigator*** (PI: Nathan Pavlovic, Sonoma Technology)

12. "Preparing for TEMPO: Considering future applications of the $HCHO/NO_2$ ratio using lessons learned from OMI and TROPOMI", NASA Aura Science Team, Submitted Sept 2019, Not Selected, ***Principal Investigator***
13. "Assessing tropospheric ozone pollution and precursors in African cities using OMI", NASA Aura Science Team, Submitted Sept 2019, Not Selected, ***Co-Investigator*** (PI: Susanne Bauer, NASA GSFC).
14. "Quantification of Air Pollution from Natural Gas Development and Relationship to Health Outcomes: A Quasi-Experimental Investigation", Submitted Sept 2018 & Sept 2019, Not Selected, ***Co-Investigator*** (PI: Charlotte Ward, Dartmouth College).
15. "Coupled Energy-Air Quality-Health System: A Data-Driven Decision Tool for Cost-Benefit Assessment", NASA Applied Sciences, Submitted Nov 2017, Not Selected, ***Co-Investigator*** (PI: Yang Zhang, North Carolina State University).

66. **Goldberg, D. L.**, et al. Validation of a satellite technique to derive high-resolution tropospheric NO_2 columns in Korea. Presented at the KORUS-AQ Science Team Meeting. Seogwipo, Jeju, South Korea. **Feb 2017**

2016

67. **Goldberg, D. L.**, et al. High-resolution OMI satellite retrievals of tropospheric NO_2 in the eastern United States. Presented at the 15th Annual CMAS Conference. Chapel Hill, NC. **Oct 2016**
68. **Goldberg, D. L.**, et al. Lifetime and distribution of ozone air pollution in the eastern United States. Presented at Carnegie Mellon University. Pittsburgh, PA. **Feb 2016, *Invited***

2015

69. **Goldberg, D. L.**, et al. Evidence for an increasing geographic region of influence on ozone air pollution in the eastern United States. Presented at the CMAS Conference. Chapel Hill, NC. **Oct 2015**
70. **Goldberg, D. L.**, et al. Recent ozone modeling results in the Mid-Atlantic. Presented at the MARAMA Science Team Meeting. Richmond, VA. **July 2015**
71. **Goldberg, D. L.**, et al. Evidence for an increasing geographic region of influence on ozone air pollution in the Eastern United States. Presented at the NASA AQAST Summer 2015 Meeting. St Louis, MO. **June 2015**
72. **Goldberg, D. L.**, et al. Scientific insight from CAMx OSAT modeling. Presented at the OTC Spring Meeting. Washington, DC. **April 2015**
73. **Goldberg, D. L.**, et al. The Impact of the Chesapeake Bay Climate and Boundary Layer Dynamics on Air Pollutant Concentrations during Smog Episodes. Presented at the AMS Annual Meeting. Phoenix, AZ. **Jan 2015**

2014

74. **Goldberg, D. L.**, et al. Recent Improvements in Regional Air Quality Models and their Impacts on Ozone Source Attribution. Presented at the CMAS Conference. Chapel Hill, NC. **Oct 2014**
75. **Goldberg, D. L.**, et al. Increased Air Pollution over the Chesapeake Bay and its Effect on Deposition to the Bay. Presented at the NADP Fall Meeting. Indianapolis, IN. **Oct 2014**
76. **Goldberg, D. L.**, et al. Higher surface ozone concentrations over the Chesapeake Bay than over adjacent land: Observations and models from DISCOVER-AQ. Presented at the DISCOVER-AQ Science Team Meeting. Newport News, VA. **Feb 2014**

First-Author Poster Presentations (10 total)

1. **Goldberg, D. L.**, et al. Evaluating the spatial patterns of NOx emissions in polluted areas with TROPOMI NO_2. Presented at the TEMPO Science Team Meeting. Huntsville, AL. **May 2023**
2. **Goldberg, D. L.**, et al. High-resolution NO_2 exposure estimates and top-down NO_X emissions using OMI NO_2 and TROPOMI NO_2. Presented at the AGU Fall Meeting. San Francisco, CA. **Dec 2019**

3. **Goldberg, D. L.**, et al. Using MAIAC AOD to estimate daily PM2.5 and its long-term trends (2008 – 2018) at 1 km resolution in the Eastern United States. Presented at the EPA ACE Annual Meeting. Pittsburgh, PA. **June 2019**
4. **Goldberg, D. L.**, et al. Using MAIAC AOD to estimate daily PM2.5 and its long-term trends (2008 – 2018) at 1 km resolution in the Eastern United States. Presented at the OWLETS Science Team Meeting. College Park, MD. **May 2019**
5. **Goldberg, D. L.**, et al. Using MODIS AOD and WRF-Chem to infer daily PM2.5 concentrations at 1 km resolution in the eastern United States. Presented at the HAQAST Summer 2018 Meeting. Madison, WI. **July 2018**
6. **Goldberg, D. L.**, et al. High resolution satellite retrievals of NO_2 and Aerosol Optical Depth for health impact studies. Presented at the AGU Fall 2016 Meeting. San Francisco, CA. **Dec 2016**
7. **Goldberg, D. L.**, et al. CAMx Ozone Source Attribution in the Eastern United Sates using Guidance from Observations during DISCOVER-AQ Maryland. Presented at the NASA AQAST Winter 2016 Meeting. RTP, NC. **Jan 2016**
8. **Goldberg, D. L.**, et al. Using Source Apportionment to Evaluate the Cross State Transport of Ozone in the Eastern United States. Presented at the AGU Fall Meeting. San Francisco, CA. **Dec 2014**
9. **Goldberg, D. L.**, et al. Using CAMx and CMAQ to Investigate Cross-state Transport of Ozone in the Eastern United States. Presented at the NASA AQAST Summer 2014 Meeting. Boston, MA. **June 2014**
10. **Goldberg, D. L.**, et al. CAMx and CMAQ Model Intercomparison for July 2007 in the Baltimore-Washington Metropolitan Region. Presented at the AGU Fall Meeting. San Francisco, CA. **Dec 2013**
